Print 100 %

CUT AROUND GREEN SQUARE

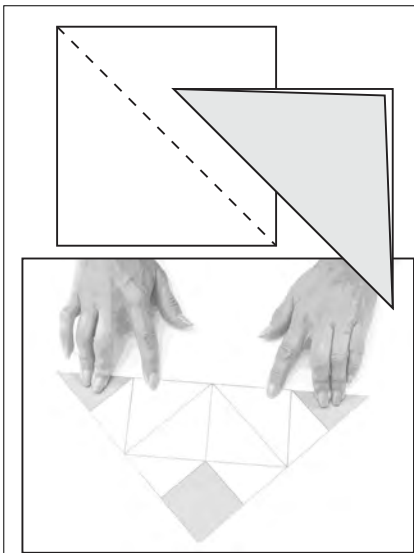

Folding Instructions

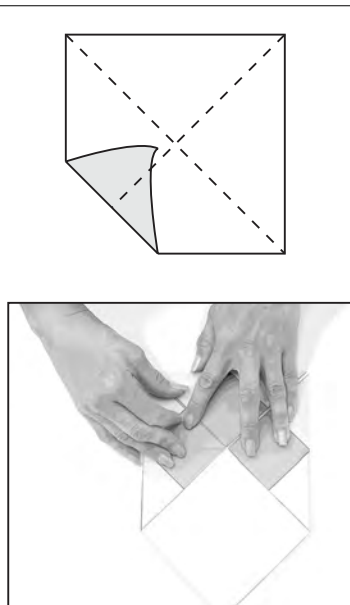

1. Cut your cootie-catcher paper (it should be a perfect square).

PDF printing note:
Print at 100%
(DO NOT print fit to page)

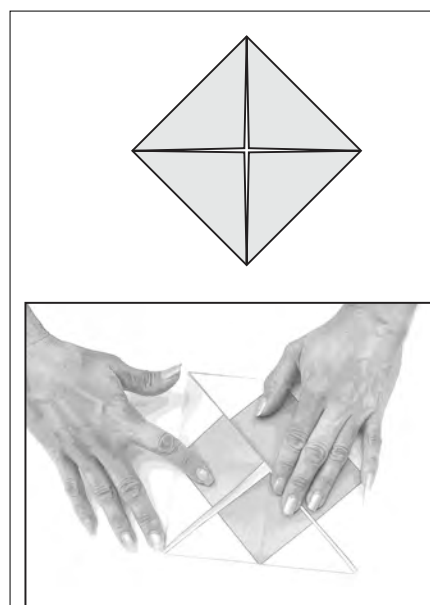

2. Fold paper from one corner to the opposite corner, making a triangle.

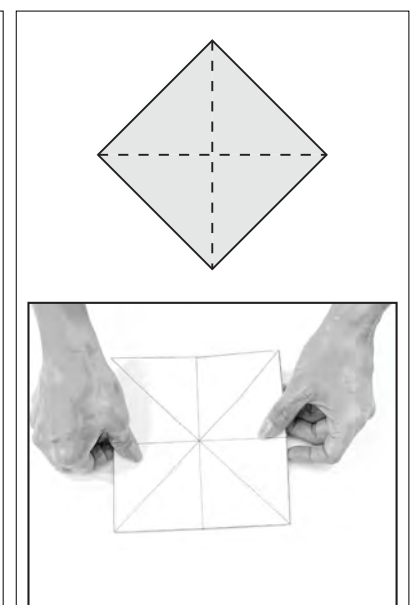

3. Unfold it and make the same fold with the other two corners, crease again.

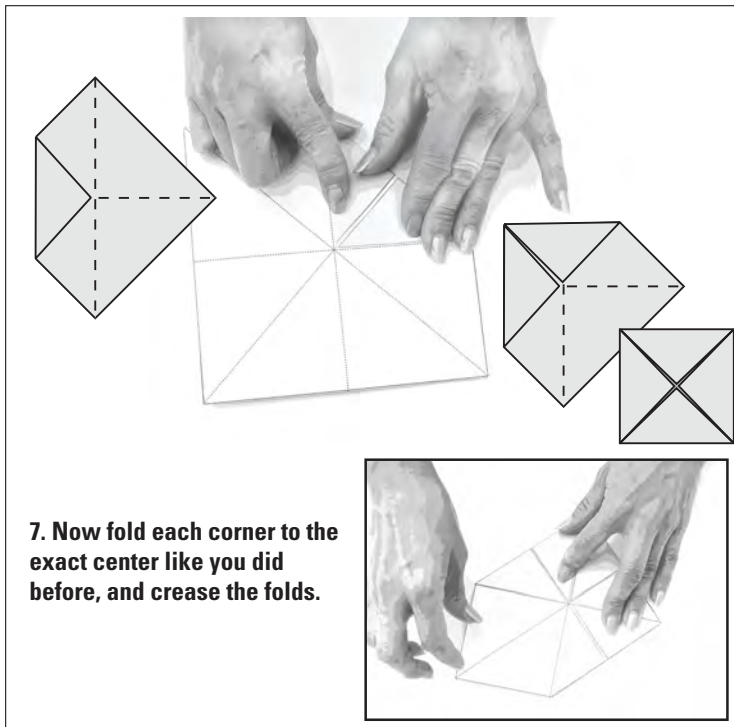

4. Fold the corners toward the center of the paper and crease the folds.

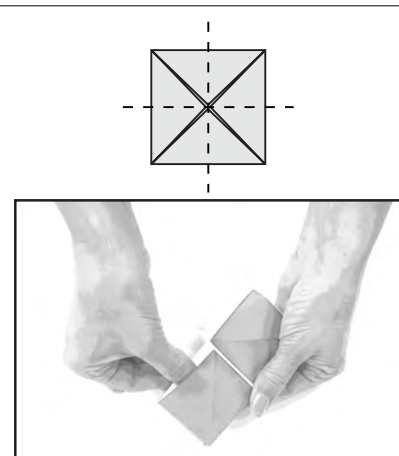

5. When all 4 corners are folded, your paper will look like this.

6. Flip your paper over so the folded sides are down.

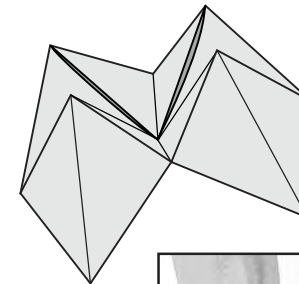

7. Now fold each corner to the exact center like you did before, and crease the folds.

8. Now, fold the paper in half along dotted lines as shown. Unfold it, and refold it in the other direction.

9. Gently pull the outside corners of the paper out a little so you can put your fingers inside the 4 pockets and open up the corners.

10. Mission accomplished!
Time to discover something new about science!
